

## What is a Swapportunity?

- A Swapportunity allows you to request coverage for a shift with the ability to select multiple providers
- The difference between a swap and swapportunity is in a swap you are only able to select one provider
- By doing a swapportunity it allows you to contact other providers quickly to find coverage and to seamlessly update the schedule with using Lightning Bolt

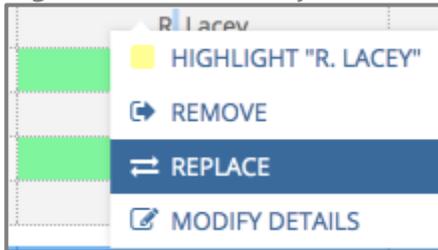

## Prerequisites

- Swapportunity must be enabled in order to initiate a swapportunity. Ask your consultant or contact [support@lightning-bolt.com](mailto:support@lightning-bolt.com) to turn on swapportunity.
- If you would like providers to receive emails regarding swapopportunities, please make sure email notification is turned on and providers have permissions to receive email notification.
- In order for a provider to initiate a swapportunity, the provider must have modify schedule permission for themselves.

# How do I initiate a Swapportunity?

Log into Lightning Bolt and navigate to **Viewer**.

**Right click** on the cell you would like to request coverage for and select **Replace**.

Select the Personnel field

## What do I do when I receive a swapportunity?

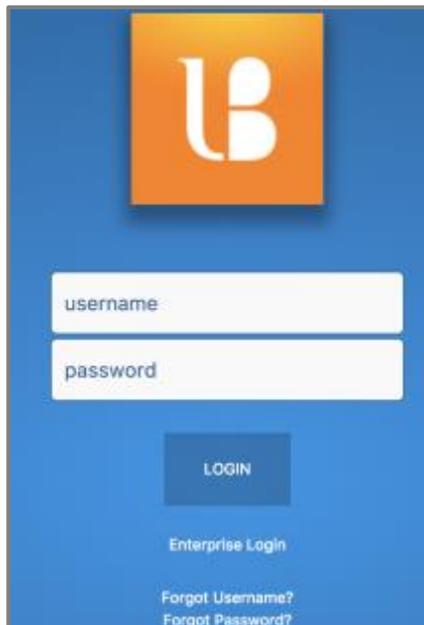

Each provider that was selected will then receive an email letting them know of the request for coverage.

If you cannot cover that shift, you can select **Decline** or leave the email alone.

If you can cover that shift, feel free to select **Volunteer**.

If you are not logged in already, it will prompt you to enter your login credentials.

It will automatically bring you to a Review and Submit window. Select **Submit** if you would like to proceed.

You then will appear on the schedule for that shift.

## The Swapportunity Feed

If you click on the LB icon from Viewer, you will get an option to select Dashboard.

On this LBLite Dashboard there is a section that will show any New or Finalized swapopportunities that involve you.
