

# Connect

With Lightning Bolt's API, use your scheduling data to optimize your healthcare operations like never before. Connect with an HR system for payroll, sync schedules with an on-call platform, or access real-time physician availability in an EHR—your shift schedule information is a simple connection away.

Anything you want!

## Connect with Ease

Through REST API, Lightning Bolt gives you maximum flexibility to build integrations to virtually any other software, in any programming language.

## Fully Documented

Since Lightning Bolt is fully documented, you can use your in-house resources for implementation. Just add the Lightning Bolt API to existing third-party software installation and start building individual solutions for your applications.
